Notice of Proposed Rule Making

A final order was published in the FEDERAL REGISTER on July 7, 1971 (36 F.R. 12734) transferring amphetamines and methamphetamine and their salts, optical isomers, and salts of their optical isomers from Schedule III to Schedule II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513), with certain exceptions.

Application of the order to Eskatrol, a combination product for which a hearing was requested, was reserved pending review by the Bureau. Eskatrol, which contains 15 mg. of dextroamphetamine sulfate and 7.5 mg. of prochlorperazine, is manufactured by Smith Kline & French Laboratories.

It is hereby ordered that a hearing regarding the transfer of Eskatrol to Schedule II will commence at 10 a.m., on August 16, 1971, in Room 1210, 1405 Eye Street NW., Washington, D.C., and that the sole hearing issue is whether Eskatrol is so related in its action to the amphetamines and methamphetamine classified in Schedule II of the Controlled Substances Act that Eskatrol is likely to have the same or similar potential for abuse as such Schedule II substances.
