

MMDA reports

#1 49 yr old male; set relaxed to very slight anxiety over personal emotional matters. SETTING: De Martin beach off Falce-klamath rock 8/29/65 11:45 AM  
11:45 150mg

12:00 slight nausea and methedrine/ritalin like effects

The 3 of us are at the falce river mouth drying seaweed on split redwood

The fire burning preparatory to cooking the rock crab just caught takes on a fantastic appearance

12:10 I withdraw, the talk of the others is too much; she puts on sunburn oil  
WOW

12:15 the tiny fairy feet of the flies, slight cramp like slight nausea and my visual field starts lighting up

12:20 some vertigo and heaviness and the stretches out; numbness in the chest as when an opiate is taken;

Still study geometric patterns; excess lite on closed lids interferes with (retinal) visualization. vertigo only with eyes open

dance of the glittering diamond studded sea waves; increasing motion and beauty

No taste, just passive introversion with large time lag

12:30 people appear on the beach and talk to my companions; I have no paranoia this surprises me;

12:35 trembling after images are very brite and last long; I see a long corridor and faces upside down 3D corridors that bend and receive me  
basket like with visions at the bottom;

the man will drive and the woman provide; two beauties and crab

thirsty and mouth slightly dry; much less than with ritalin or LSD etc

green to rose after image

NEED A SEMI SLEEP STATE FOR NEUROTICS/PLUS THIS DRUG/ so they can let go to its effects better

Increasing landscapes appear inside; inwardly I told her of her beauty and the outward she also responded by looking up at me.

(this is a good introductory drug to the drugs of this class)

to become familiar with the drug state in as gentle as possible fashion

Later; I see my mother in an animated conversation with another woman

this was at 1:30

12:50 to give self roses and to cut off the trash and 'worry' so as to enter the semi dream state where you are protected; not as noisy(many) dreams  
?as in live? or more?

music or sea

as a structured backdrop against which to go in

bold kneaded wrestler geni probably on waves Like LSD nook barred woman

sits up man upside down face; fabulous kiss bitter crab and people

million fingered dance of the sea; green apple crunch

I hallucinate lists hungarian rhapsody

and the waltzes

then see at 1:30 my mother as above.

Remarks: this substance seems to have a much gentler action than others of this class; perhaps more like Cannabis or psilocybin; there is little paranoia reported by anyone

I noted the hallucinations of the two types: one, those which were strictly retia retinal and more minute and small and influence by lite and evoked by 'focus using' on the 'lite' ahead on the retina or lids, and the other those deeper in the visual tract and occiput which are larger and more global dream like and when solid are quite dramatic and unforgettable as in meditation.

There is less adrenergic or alerting effect per hallucinatory unit of this drug as well;
